**Whitney on Wheels (WOW)  
is excited to announce its partnership with Green Tech High School!**

- WOW brings primary health care services directly to your student at their school!
  - Billing is the same as if your student attended a provider's office for a visit
  - We can help families enroll in health insurance
  - We offer a sliding fee for those without insurance or with financial hardship
- We always **welcome and encourage families to attend** appointments with their student
- We can provide **physicals** and **immunizations** required for school to all enrolled students
- In the event of **illness or acute injury** we can treat your student if they are enrolled
- We can help your student manage health conditions such as **asthma** and **diabetes**
- We work with your **school nurse**; we do not replace them
- We provide **continuity**. If your student is seen on WOW, they become an **established primary care patient with Whitney Young Health** and can be seen at any of our locations in Albany, Troy, or Watervliet.
- Students have **24 hour access** always. If school is not in session or WOW is not on site, families can call Whitney Young Health at 518-465-4771.

*If you have questions or would like to enroll your student, please complete the WOW Enrollment Packet and/or contact your school nurse for more information.*
